

**Intro to Operating Systems  
CNET 173 - Spring 2011**

**Assignment #5  
Types of System Calls**

**Assignment due: March 28, 2011**

Using the list of system calls below, if your B# ends in an odd number, write a paper on system calls (1, 3, and 5). If your B# ends in an even number, write a paper on system calls (2, 4, and 6). You are to write  $\frac{3}{4}$  of a page on each system call.

This assignment must be typed, printed and turned in at the beginning of class time. It should include a title page consisting of **your name, course name, number, day and time, assignment name, instructor's name, and due date.**

## **Types of System Calls**

- 1. Process control**
- 2. File manipulation**
- 3. Device manipulation**
- 4. Information manipulation**
- 5. Communications**
- 6. Protection**
