Program 7

Using the previous array program (Sort and Search), rewrite the program using a pointer to display the original and sorted contents of the array.

Ex: Use   arr++   **where arr is the name of the pointer pointing to that array**

Program 8

Using the previous array program (Sort and Search), rewrite the program processing the array using pointer notation to display the original and sorted content of the array.

Ex: *(array + x)   **where array is the name of the array and x is the element of the array**
